Stylish Compact Desktop KVM Switches featuring DisplayPort, HDMI, DVI and VGA video!

A dainty collection of designer gadgets to stand out among your desktop peripheral landscape!
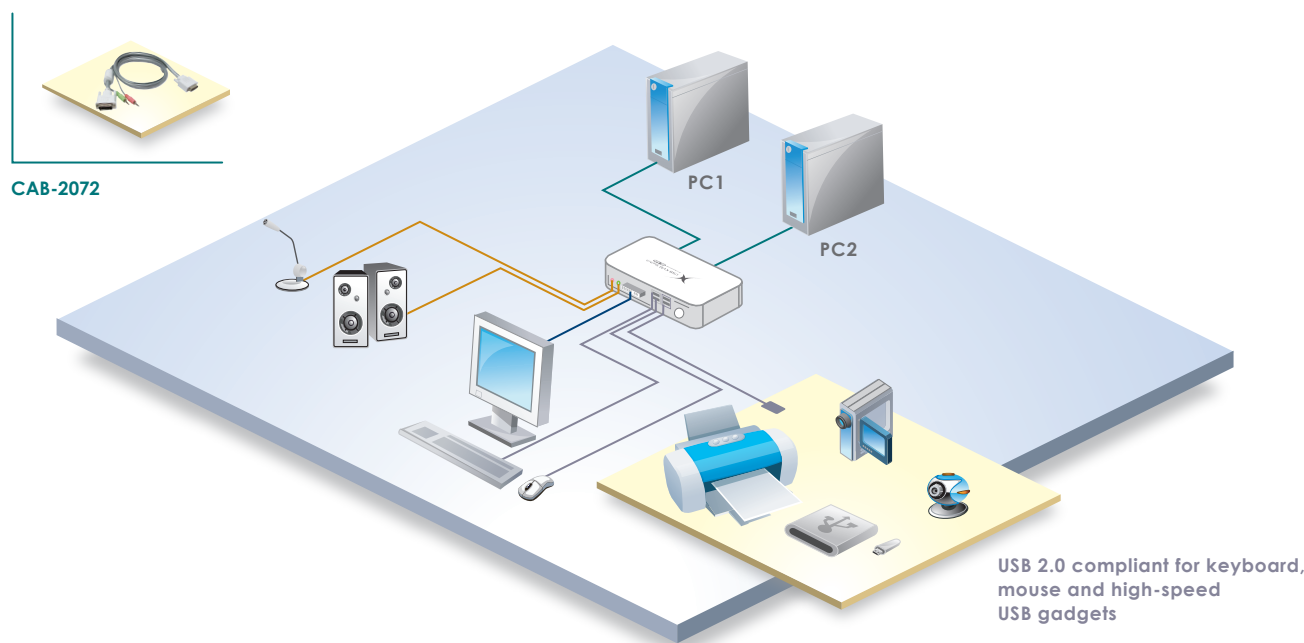

This stylish Compact Desktop KVM Switch family gives more than something of an ordinary desktop KVM Switch: It has everything worthy and noble inside, goodies such as the **True Transparent USB (TTU)** keyboard / mouse Emulation and **All-time DDC Video Emulation!** With both technologies, you can simply sit back and forget about everything nasty about keyboard, mouse and video glitches due to incompatibility. There are different video interfaces for your choice: either DisplayPort, HDMI, DVI or VGA. Two extra USB 2.0 device ports on the front-side are created for easy connections to your USB flash disks, external hard drives, webcams, printers, etc. Stereo audio and mic are supported too. This designer KVM Switch with its fancy outlook and extreme functionality is really something that you would like to have on your desktop!

Features

- Video interface available for DisplayPort, HDMI, DVI or VGA
- 2 extra USB 2.0 device port for high-speed USB device sharing
- True Transparent USB emulation technology for any keyboard and mouse
- All-time DDC Emulation for ultimate video compatibility
- Independent peripheral switching configurable by hotkeys
